Profile

Developer and designer with hands-on experience in design, audiovisual production, landing pages, photo and video editing, complex websites, full-stack development, and vibe coding. I create both personal projects and client solutions, combining visual identity, digital products, music production, and technology. I have also been studying Artificial Intelligence for 2 years and develop projects with attention to user experience and visual presentation.

Core skills

Development: landing pages, complex websites, full-stack development, and vibe coding.

Technologies: Cloudflare, R2, D1, TypeScript, C++, Stripe, and Mercado Pago.

Design and audiovisual: visual identity, practical design, photo and video editing, filming, lighting, set design, and decoration.

Music production: music production and more than 5 years of music studies.

Tools

Advanced	Intermediate
Photoshop • CapCut • FL Studio • Microsoft 365	Illustrator • After Effects • Premiere • DaVinci Resolve

Selected projects

Clydes — Audio platform • Personal project • 2024–Present

I conceived and founded Clydes, an ecosystem of audio plugins, music production, and automation tools supported by a community of producers and a group of programmers. I built the brand from scratch in January 2024, including the complete visual identity, packaging, business card, T-shirt, logo, and the clydes.com.br website. I used Cloudflare,

R2, D1, TypeScript, C++, Stripe, and Mercado Pago to develop the ecosystem and its infrastructure.

Clydes Launcher — Desktop application • Personal project • In progress

I developed Clydes' desktop application, featuring a news system and centralized resources in one place, using C++ and integrating it with the ecosystem built with Cloudflare, R2, D1, TypeScript, Stripe, and Mercado Pago. It is my largest personal project.

Payandeh — Visual identity • Freelance client project • July 2026

I created a complete visual identity for a Persian client's clothing brand, combining streetwear aesthetics with references to Persian culture.

Mili — Audiovisual production • Client project • October 2020

I worked on the production of a Mili advertising campaign in filming, lighting, set design, and decoration, ensuring that the aesthetic and technical elements followed the brand's creative direction.

Music production • Personal project • Ongoing

I produce music as a hobby and develop original work, including "EPICDRUMS" and a soundtrack inspired by *Doom* and *Mossback*.

Education and certificates

Programming Training — Rocketseat • Intermediate English — Influx, currently studying • Completed high school • Music — more than 5 years of study • Design — practical knowledge • Artificial Intelligence — studying for 2 years

Information that would strengthen the résumé

Measurable project results; the size of the Clydes community and programming group; the specific technologies used in each part of Clydes and the Launcher; number of clients served; links to portfolio, projects, and published materials; and the priority role or type of opportunity being targeted.
